## 1. Downloads

### 1.1. Download Notes

This page gives access to source downloads of the latest releases for the Xindice. Releases are now distributed via various **archive** sites around the world, and the links below will direct you to an archive near you. Alternative mirror locations are also provided.

The source archives below are the latest release versions. Access to the latest (and possibly unstable) source can be done via [svn](#).

### 1.2. Mirror

You are currently using the **[preferred]** mirror. If you encounter a problem with this mirror, please select another mirror. If all mirrors are failing, there are *backup* mirrors (at the end of the mirrors list) that should be available.

Other mirrors: [\[http\]](#)[\[ftp\]](#)[\[backup\]](#) (backup)
