dSHIFT Migrator for SharePoint

Get results, not just a product

The SharePoint Migrator can easily move contents and permissions from WSS 3.0 or MOSS 2007 to SharePoint 2010 or SharePoint Online. The SharePoint Migrator can perform even complex migrations in just a few clicks, with a simple drag-n-drop interface. Because it's built on top of the Microsoft SharePoint APIs, risk of content loss is minimal.

Pre-migration Scanning
Gather detailed information on your existing or desired SharePoint environments to ensure a seamless migration path and eliminate confusion to users.

SharePoint Migration
Once you drag and drop the contents to its new destination, the SharePoint Migrator takes over and completes the process.

Scheduled Migration
Scheduling the migration jobs at off-peak hours and in batch ensures minimal impact to the end users.

Backup & Restore
Regular backups of the SharePoint content ensures data safety, and can be restored as needed.

Governance Rules
The governance rules in your existing or desired SharePoint environment can be seen in a one-window operation, saving the time and hassle otherwise spent navigating various screens to consolidate this information.
Notifications
Site-wide notifications or banners on selected sites can be published for a specified timeframe to keep users informed of important updates.

Migration Validation
SharePoint Migrator automatically validates the content integrity to ensure no loss of data and provides a post-migration report with a comprehensive list of this content.

Technical Support
We provide hands-on support to make your migration a success. Support hours are included in every package.

Our team of SharePoint experts have helped thousands of our satisfied customers around the globe, all of whom rely on the SharePoint Migrator and our support services.

✔ Peter Gilbert, BuroHappold
"... I just wanted to say how impressed I have been with your company's responses and work throughout this whole project."

✔ Gayatri Vasan, Symmetricom
"Thank you very much for your excellent and timely support for our migration project. I am very happy with the migration tool..."

✔ Sam Shirley, NBIC
"The migration went very well! Your team was incredibly helpful during the process. Thanks again"
