## 8.0 FAQ

Q. Please provide default setting information?

A. default setting of StarLink Manager given blow

User/Password	system@starlink/manager
StarLink Manager default port	8021 TCP
StarLink Manager Configuration File	web.config
Location of configuration file	C:\Inetpub\wwwroot\StarLink

Q. Can Change of StarLink Manager port is possible?

A. yes change of port is possible.

Q. How to change StarLink Manager port?

A . Find out StarLink service host and port then Open Configuration file “web.config” in notepad. For Example I found that my StarLink service is running 9921 port host localhost so change port is required from 8021 to 9921

Change value from

```
client url="http://localhost:8021/RemotingSMS">
```

```
<wellknown type="service.StarLink.ServiceNeXT, service.StarLink"
url="http://localhost:8021/RemotingSMS/ServiceNeXT.soap" /> </client>
```

to

```
client url="http://localhost:9921/RemotingSMS">
```

```
<wellknown type="service.StarLink.ServiceNeXT, service.StarLink"
url="http://localhost:9921/RemotingSMS/ServiceNeXT.soap" /> </client>
```

Q. Always got message invalid mobile number, is any validation set for mobile number?

A. YES, mobile number validation set for 10 or 10 + digit numbers (e.g. +919415917612). if you require deferent mobile number validation contact to support team.

Q. Whenever I send command always got message *the underline connection was close: unable to connect remote server?*

A. this is due to service not available or invalid configuration. Find out correct configuration, service status from your StarLink Administrator.

## 8.0 For More Information

For more information about configuring and using the components in the packages, contact
