### What is TrackThrough?

TrackThrough is an application that monitors, tracks and plans the activities of a particular project. The software acts as a common place online but yet private to exchange the required information and documents through.

#### Features of TrackThrough:

- ➔ Defines projects and tasks
- ➔ Leads and teams concept
- ➔ Streamlines work flow and aids in task assignment and delegation
- ➔ Tracking issues
- ➔ Progress reporting relating to tasks and issues

### Why TrackThrough?

Although there are a range of other project management software options available to business, which even in some cases offer better features, TrackThrough is simple, easy to use and is an extremely efficient tool to work with. It is designed to have very few features, but just enough to achieve what one needs to within a business such as:

- ➔ It is an excellent add-on to your current website to monitor projects.
- ➔ It acts as a shared document repository but is still private enough to distribute the required documents through.
- ➔ Teams and projects can be managed remotely.
- ➔ It is a FREE application (includes complete source).

TrackThrough is designed to be used by many businesses. These include consulting firms, small to medium sized companies, professional firms as well as educational institutions.

TrackThrough is freely available for any purpose, please visit [license](#) page for more details.

We welcome your suggestions and feedbacks to make it simpler, leaner and useful.

Please feel free to [write to us](#) for any questions or feedbacks.

## System requirements

To install the TrackThrough, your system should have the following requirements.

### A PHP supported webserver

A webserver with PHP support is required; preferably Apache.

TrackThrough will work on Apache 1.3 or Apache 2.x hosted on unixes or windows or others (but not tested).

### PHP

PHP of version 5 or higher is required.

### MySQL 4.1 or MySQL 5.0

Your host should allow the database accounts with the following rights:

SELECT, INSERT, UPDATE, DELETE, CREATE, DROP, INDEX, ALTER, CREATE TEMPORARY TABLES, LOCK TABLES.

## Release notes

### TrackThrough version 1.4.4 [14 May, 2015]

- ➔ New user interface - completely redone [new]
- ➔ Stats feature in dashboard [new]
- ➔ Priority feature for task and issues [new]
- ➔ Sorting task and issues improved [new]
- ➔ User profiles with avatar [new]
- ➔ Hiding of unwanted projects [new]
- ➔ New filters (priority and date) in reports tab [new]

### Known issues

- Supported in IE8 and latest browsers.

### **TrackThrough version 1.4.3** [9 January, 2014]

- ➔ Copy issue feature [new]
- ➔ New themes: Lime and Black [new]
- ➔ Admin login name edit issue fixed [bug fix]
- ➔ Uploads folder [security fix]
- ➔ Layout changes in dashboard, admin site settings page, profile page, user registration page
- ➔ User can't delete his own message when the task/issue is closed [bug fix]
- ➔ Task export feature [new]
- ➔ Wider layout and fixed header
- ➔ Disallow user deletion [new]
- ➔ Change owner/lead feature [new]
- ➔ Issues export bug [bug fix]
- ➔ Attachment type settings by admin [new]
- ➔ HTML encoding issue in tooltips [bug fix]
- ➔ Message display issue during blank attachment upload [bug fix]
- ➔ Display issue when attachment name is too long [bug fix]
- ➔ Once the task is unassigned for the team, the respective message is sent to team, team is unable to read the message (the unread message is kept as unread only). It's status doesn't change, and the message icon doesn't disappear [bug fix]
- ➔ The user is able to assign the user who does not have execute task permission [bug fix]
- ➔ Progress value remains same when task is copied from one project to another [bug fix]
- ➔ Text wrapping issue usually when there are long characters without any gap (Fixed in all browsers except opera-9.64) [bug fix]

### **TrackThrough version 1.4.2** [7 March, 2013]

- ➔ Issue tracking [new]
- ➔ Promote issue as task [new]
- ➔ Export issues to PDF format [new]
- ➔ Filter projects, tasks and issues [new]
- ➔ Task reports and issue reports [new]
- ➔ Status icons [new]
- ➔ Assigning tasks to multiple users [new]
- ➔ Closing, re-opening, review and re-assign of tasks [new]
- ➔ Dashboard [new]
- ➔ New settings related to dashboard, search [new]
- ➔ Message inbox [new]
- ➔ Site settings feature for Admin [new]
- ➔ New permission types - view only and execute project [new]
- ➔ Bookmarks renamed to favorites [new]
- ➔ Edit profile, update settings and logout are under single drop-down menu [new]
- ➔ Message and email issues resolved [bug fix]

## Known issues

- Text wrapping issue usually when there are long characters without any gap
- Display issue when attachment name is too long
- Once the task is unassigned for the team, the respective message is sent to team, team is unable to read the message (the unread message is kept as unread only). It's status doesn't change, and the message icon doesn't disappear.
- The user is able to assign the user who does not have execute task permission
- Progress value remains same when task is copied from one project to another.

## TrackThrough version 1.4.1 [1 October, 2012]

- ➔ Improved mobile access - trackthrough/mini. [new]
- ➔ Search feature. [new]
- ➔ Copying tasks from one project to another. [new]
- ➔ Feature to add/change project icon.[new]
- ➔ Feature to edit project and task descriptions. [new]
- ➔ Feature to preview image attachments. [new]
- ➔ Large file download issue. [bug fix]
- ➔ Task assignment issue. [bug fix]
- ➔ Task comment mandatory(\*) field removed.
- ➔ Design change - Improved user permission model. [new]

## TrackThrough version 1.4 [15 May, 2012]

- ➔ Mobile friendly web application - trackthrough/mini. [new]
- ➔ Progress bar widget in project (or task) dashboard. [new]
- ➔ Customizable themes. [new]
- ➔ Bookmark feature for projects, tasks and messages. [new]
- ➔ Accordion feature for project dashboard. [new]
- ➔ Attachment icons based on file types. [new]
- ➔ User specific settings to control number of projects and messages to be displayed. [new]

## TrackThrough version 1.3.1 [25 February, 2012]

- ➔ Improved installation page. [new]
- ➔ Style configurations for iPhone. [new]
- ➔ Bug fixed in settings module. [bug fix]

## TrackThrough version 1.3 [21 November, 2011]

- ➔ Unread messages - link to unread messages on user dashboard [new]
- ➔ Editing of project and task titles (for leads) [new]
- ➔ Hyperlinked project and task descriptions [new]
- ➔ Alternate colors for sent/received messages [new]
- ➔ Attachment upload size display [new]
- ➔ Unique message identifiers for project and task correspondences [new]

➔ Copy of all correspondences to the administrator [new]

➔ Improved error reporting [bug fix]

### TrackThrough version 1.2 [20 May, 2011]

➔ Fixed mail issues [bug fix]

➔ Added CSS to support iphone [new]

Please check manual/trackthrough\_manual.pdf for installation instructions and usage.

## Upgrading from version 1.4.3 to 1.4.4

### 1. Please make a backup of your current installation folder and database.

### 2. Download TrackThrough version 1.4.4

Download the latest trackthrough\_1\_4\_4.zip from <http://bispark5/bispark.com/trackthrough/download> and extract (unzip) this to a temporary directory.

```
e.g.: extract trackthrough_1_4_4.zip to /temp/trackthrough_1_4_4.
```

Copy the contents of includes, manual, mini, resources and scripts folder from above download to your current installation.

```
e.g.:
cp /temp/trackthrough_1_4_4/includes to /var/www/trackthrough/
cp /temp/trackthrough_1_4_4/manual to /var/www/trackthrough/
cp /temp/trackthrough_1_4_4/mini to /var/www/trackthrough/
cp /temp/trackthrough_1_4_4/resources to /var/www/trackthrough/
cp /temp/trackthrough_1_4_4/scripts to /var/www/trackthrough/
```

### 3. Edit config.ini file

Edit config.ini file in your installation folder as shown below:

```
[ETC]
project_attachment_folder=uploads/project/
mail_template_folder=resources/mail_templates/
attachment_icons_folder = attachment_icons
hashed_password=false
version = 1.4.4
```

```
[THEMES]
default_theme = black
names=grey,lime,violet,red,plum,black
```

### 4. Run upgrade script

Open command console, change to scripts folder.

```
e.g.: cd /temp/trackthrough/scripts
```

Run `db_upgrade_to_1_4_4.php` script as shown below:

```
e.g.: php db_upgrade_to_1_4_4.php
```

**Caution:** Please change the localhost, username, password, database name and prefix according to your previous installation settings in the `db_upgrade_to_1_4_4.php` file.

## Upgrading from version 1.4.2 to 1.4.3

### 1. Please make a backup of your current installation folder and database.

### 2. Download TrackThrough version 1.4.3

Download the latest `trackthrough_1_4_3.zip` from <http://bispark5/bispark.com/trackthrough/download> and extract (unzip) this to a temporary directory.

```
e.g.: extract trackthrough_1_4_3.zip to /temp/trackthrough_1_4_3.
```

Copy the contents of `includes`, `manual`, `mini`, `resources` and `scripts` folder from above download to your current installation.

```
e.g.:
cp /temp/trackthrough_1_4_3/includes to /var/www/trackthrough/
cp /temp/trackthrough_1_4_3/manual to /var/www/trackthrough/
cp /temp/trackthrough_1_4_3/mini to /var/www/trackthrough/
cp /temp/trackthrough_1_4_3/resources to /var/www/trackthrough/
cp /temp/trackthrough_1_4_3/scripts to /var/www/trackthrough/
```

### 3. Move *uploads* folder to TrackThrough root directory

```
e.g.:
var/www/trackthrough/resources/uploads
to
var/www/trackthrough/uploads
```

Please make sure the upload folder has `.htaccess` file in it. The `htaccess` file should have following content:

Order deny,allow

Deny from all

```
<FilesMatch "\.(png|jpe?g|gif)$">
```

Satisfy Any

Allow from all

```
</FilesMatch>
```

### 4. Edit `config.ini` file

Edit `config.ini` file in your installation folder as shown below:

```
[ETC]
project_attachment_folder=uploads/project/
mail_template_folder=resources/mail_templates/
```

```
attachment_icons_folder = attachment_icons
hashed_password=false
version = 1.4.3

[THEMES]
default_theme = blue
names=yellow,grey,plum,violet,blue,green,red,lime,black
```

## 5. Run upgrade script

Open command console, change to scripts folder.

```
e.g.: cd /temp/trackthrough/scripts
```

Run db\_upgrade\_to\_1\_4\_3.php script as shown below:

```
e.g.: php db_upgrade_to_1_4_3.php
```

**Caution:** Please change the localhost, username, password, database name and prefix according to your previous installation settings in the db\_upgrade\_to\_1\_4\_3.php file.

## Installation instructions

### Download TrackThrough

Download the latest trackthrough\_x\_x.zip (compressed source) file from <http://bispark5/bispark.com/trackthrough/download>.

Unzip trackthrough\_x\_x.zip file into your webserver's document root.

```
e.g.: C:\Program Files\Apache Software Foundation\Apache2.2\htdocs or
/var/www/html (please check your webserver documentation to find out
correct document root path).
```

If you have configured a virtual host, use the appropriate directory to unzip the source.

### Directory structure

After you unzip the source please verify that the installation directory resembles the screenshot.

Please make sure the folder templates\_c is writeable for web user.

## Web installation

To install TrackThrough, you need to run install.php from web browser.

1. Visit the following URL using your favorite browser <http://yoursite.com/trackthrough/install.php>; this should take you to a page (please check the screen shot) asking to input following details - database name, database server, database user name and database user password.

2. Input the database particulars.

3. Input Admin username, Admin password, Admin email address & submit. If everything goes fine, you should see an installation success page (please check the screenshot).

If you had problem using the web installation you may want to try the manual installation procedure explained in the next section.

## Manual installation

### 1. Create TrackThrough database

Create a database (e.g.: ttddb) using phpMyAdmin or any other MySQL client. Import the database schema from file ttddb.sql (you can find schema file inside scripts folder).

```
e.g.: mysql -uusername -p -h localhost ttddb < C:\...\your_
installation_directory\scripts\ttddb.sql
```

### 2. Configure ini file

Copy the file config.ini.original from installation\_directory/scripts to installation\_directory /config.ini.

```
e.g.:
copy your_installation_directory\scripts\config.ini.original your_
installation_directory\config.ini
```

### 3. Edit config.ini to modify the following variables

**Base URL:** Web address of for your installation  
(<http://yoursite.com/trackthrough>)

**Database name:** Database source name – ttddb (the one you created above).

**Database server:** The MySQL server. It can also include a port number.

```
e.g.: hostname:port or a path to a local socket
e.g.: /path/to/socket for the localhost
```

If the PHP directive mysql.default\_host is undefined (default), then the default value is localhost:3306.

**Database username:** Default value is the name of the user that owns the server process.

**Database password:** Default value is an empty password.

## Common error messages

### Application is already installed; please remove 'config.ini' file and run this script to reinstall the application

You get this error when TrackThrough is already installed. To reinstall the application, access the installation URL after removing the config.ini file.

### Missing config file in the distribution source

The file config.ini.original is missing from your source.

Please check installation\_directory/script folder for the config.ini.original file.

### Can't create ini file

The installation directory may not have write/create permission for web user.

### Could not connect to MySQL Server

The error indicates incorrect database particulars.

### Could not create database. Database already exists

The database you are trying to create already exists. Select YES option for Have you already created a database? and resubmit the values. You may also want to input table prefix if you are sharing the database with other applications.

### There is no database by name .....

The database is not yet created; you can create the database manually and resubmit the page. Alternatively select NO option for Have you already created a database? and resubmit the values.

### Missing sql file in the distribution source

You may have not copied the correct installation source.

### Invalid config file

You may have not copied the correct installation source.

## Getting started

### Welcome to TrackThrough!

It is advisable for all newcomers who are not familiar with TrackThrough to start and go through our [introduction](#) set.

TrackThrough can be downloaded from this link: <http://bispark5/bispark.com/trackthrough/download>.

And for newcomers who require some assistance with installing TrackThrough, you can find the [installation instructions](#).

### Below are some terms to familiarise yourself with:

**Admin:** A user, who has access to all the features of TrackThrough.

**Leads:** A user who can lead a group of projects and teams, define projects, tasks and can assign tasks to teams.

**Teams:** A group of users who execute tasks, they can only access their own tasks.

**Attachments:** Documents shared through a project and task messages.

**Project:** A collection of tasks.

**Tasks:** Tasks are the activities that make a project.

**Issues:** An issue is a trouble ticket or incident ticket recorded by testers or end users.

**Messages(Comments):** Information, feedback or instructions pertaining to a task or project.

## TrackThrough concepts

TrackThrough is a web application and has the following:

- ➔ Web Client which is accessed using your browser.
- ➔ Application backend which is installed in a location at web server.

## Administer site settings

You will be required to login to the administration account to make the following changes:

Select the tab **Site Settings** from main menu

\* Email Address:

admin\_user@your\_trackthrough.com

This must be a valid email address. Max. 100 characters.

### From email address

The email address reflected in the from address field when you receive application generated emails.

\* Company Name:

Your Company Name

Max. of 50 characters in length.

### Company name

This reflects the name of the company which uses the TrackThrough application.

☒ Copy mails of project/task messages to Administrator

### Copy mails of project or task messages to administrator

This is a check box that needs to be selected or not, depending on which option you prefer. It is advisable to check this box as this will allow you or the administrator to receive copies of emails relating to projects or task messages that are actually intended to keep the administrator informed of all happenings on TrackThrough.

## Attachment settings

This reflects the attachment files that the user can upload to his project, task, issue or comments. This may be useful if the administrator needs to restrict certain file formats. If no file formats is specified in the field, the users can upload png and zip files by default.

#### Attachment File Types (extensions):

png,gif,jpeg,jpg,txt,doc,docx,xls,xlsm,sql,php,psd,mht,ini,ppt,mdb,css

Allowed upload file extensions; e.g. png,gif,xls,xlsx,csv,doc,ppt  
Leave it empty to allow only .PNG and .ZIP files.

## How to create teams or leads?

In order to create leads or teams, you will be required to login into TrackThrough as an administrator.

Messages	More ▼	Search
	Favorites	
	Users	
	Site Settings	

Select the tab **Users** from main menu

Users + [New user](#)

Click the link + [Add new user](#)

\* Email Address:

This must be a valid email address. Max:100 characters.

\* First Name:

Max: 16 characters.

Last Name:

Max: 16 characters.

#### Permissions:

☐ This user can create projects

Select the check box to allow user to create projects

Submit

Reset

#### Input user details

You will then be required to add the personal details of the user you would like to add. These details include registration details such as the user's email address, the user's first name as well as the user's last name.

You will need to select an appropriate user(login) name you are creating, a password you will need to set permissions for the user, for instance if a user is allowed to create tasks and/or execute tasks, these permission are selected in the form of check boxes, click submit and you have successfully created a user.

## Profile

You need to login to TrackThrough and select Profile menu to change settings.

**Select the menu *Profile* from main menu**

**\* First Name:**

  
Max. 16 characters.

**\* Login Name:**

  
Login Name must be at least 3 characters in length.  
Max. 8 characters.

**Input your details**

You are required to add your personal details like first name, last name, login name and E-mail address.

**Avatar:**

  
 No file chosen  
Max. Upload size 1M; Recommended dimensions (41px X 41px); Allowed formats (png,jpg,gif).

**Upload your photo as Avatar**

You can upload your photo as avatar. You can click on Choose File button and upload your photo.

## Dashboard

You need to login to TrackThrough to view dashboard. The Dashboard is made up of 4 blocks where you are able to view latest messages, stats, tasks assigned to you and tasks assigned to others.

Dashboard Projects Tasks

**Dashboard**

Stats

Tasks (27)

Open (10)

Inprogress (13)

Review Pending (4)

Closed (1)

**Stats**

It includes number of open, inprogress, review pending and closed tasks for logged-in user; also open and closed issues for the user.

DashboardProjectsTasks

### Tasks for others

These are the tasks you own and assigned to others for execution. You can click on these tasks to visit the task page.

## User settings

Login to TrackThrough system and go to profile menu (at extreme right of menubar).

Admin

Profile

Settings

Logout

Update Settings

### Select *Settings* menu

You can find settings related to application management. Below are the settings you find:

#### General settings:

Users per page:

No. of users to be displayed in users tab; e.g. input 20 to display 20 registered users

### Users per page (for admin only)

This option is only available to an administrator and this is where you would select how many users are displayed in the users tab.

bispark software, Dharwad

Projects per page:

No. of projects to be displayed in projects tab;  
e.g. input 20 to display 20 latest projects on the projects tab.

### Projects per page

This is where you can select how many projects you view on a single page at your projects page.

Task comments per page:

No. of task comments to be displayed in task view tab; e.g. input 20 to display 20 latest comments.

### Task comments per page

Here you select how many comments are displayed per task, meaning that you will not view all comments at once, but in pages reflecting the number of comments you selected.

Max. messages per page:

No. of messages to be displayed in messages tab;  
e.g. input 50 to display 50 messages.

### Maximum messages per page

Select how many messages you would like to be displayed at messages tab.

## Dashboard settings:

Max. records per block in dashboard:

No. of tasks to be displayed in dashboard tab;  
e.g. input 20 to display max 20 tasks in blocks.

### Maximum records per block in dashboard

Here you are able to select how many records are displayed at dashboard block.

☒ Show latest unread messages

Latest unread messages.

### Show latest unread messages

Select the checkbox to display unread messages at unread messages block.

☐ Show tasks assigned to others

Task assigned to others that were updated recently.

### Show tasks assigned to others

Select the checkbox to display task assigned to others if you are the lead of any project and have assigned the task to other users.

☒ Show tasks assigned to me

Task assigned to me that were updated recently.

### Show tasks assigned to me

Select the checkbox to display task assigned to you if you want to view latest task assigned to you at dashboard page.

## Promoted tasks settings:

☐ Close task when issue is closed

Select to close task automatically when issue is closed.

### Close task when issue is closed

Select the checkbox if you want the promoted task to be closed automatically when the related issue is closed.

☐ Close issue when task is closed

Select to close issue automatically when task is closed.

### Close issue when task is closed

Select the checkbox if you want the promoted issue to be closed automatically when the related task is closed.

## Issue report settings:

Show all comments for open issues

<input type="checkbox"/> <b>Show all comments for open issues</b> Select to display all comments made on open issues.	Select the checkbox to show all comments of open issues when exporting the issues to PDF.
<input type="checkbox"/> <b>Show only closing comments for closed issues</b> Select to display only last comment made while closing the issue.	<b>Show only closing comments for closed issues</b> Select the checkbox to show only closing (last) comment of closed issue when exporting the issues to PDF.
<input type="checkbox"/> <b>Show attached image with comments in export PDF</b> Select to display images attached with issue comments in PDF file.	<b>Show attached image with comments in export PDF</b> Select the checkbox to show attached image along with comments when exporting issues to PDF

### Search preferences:

Select the check box to include the contents to be searched during your regular search from search, e.g. keep the “search issue details” checked. to look for all issues having a required search term in the title or description.

<input checked="" type="checkbox"/> <b>Search project details</b> Select to enable searching of project details.	<b>Search project details</b> Select the checkbox to search content from projects.
<input checked="" type="checkbox"/> <b>Search task details</b> Select to enable searching of task details.	<b>Search task details</b> Select the checkbox to search content from tasks.
<input checked="" type="checkbox"/> <b>Search issue details</b> Select to enable searching of issue details.	<b>Search issue details</b> Select the checkbox to search content from issues.
<input checked="" type="checkbox"/> <b>Search message box</b> Select to enable searching of projects, tasks and issues messages.	<b>Search message box</b> Select the checkbox to search content from messages.

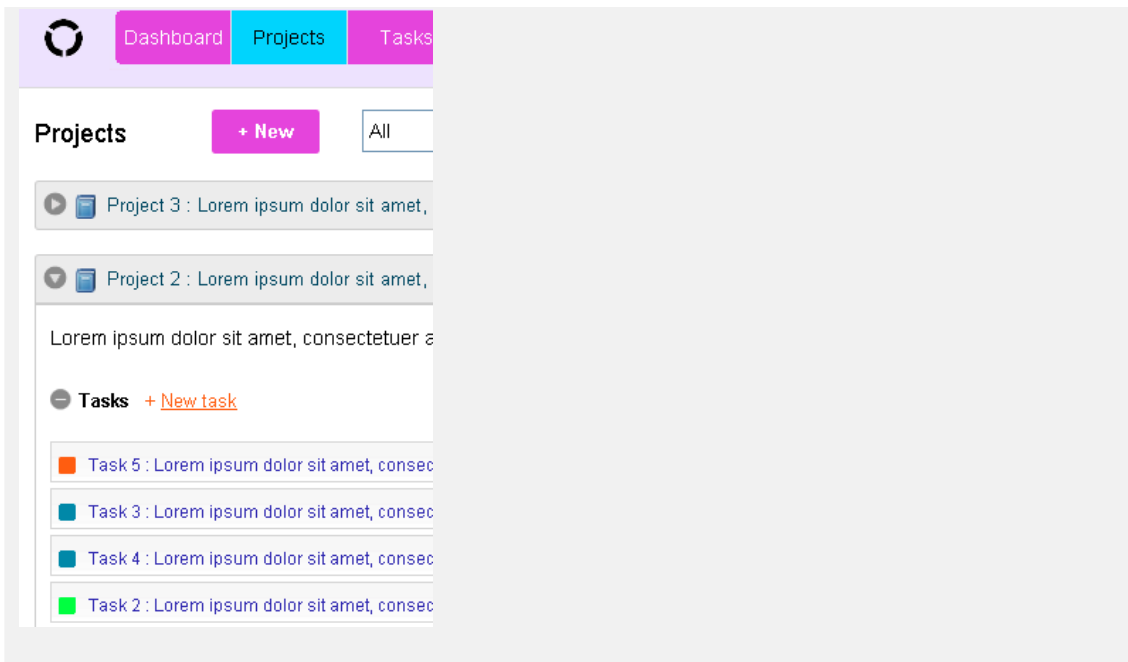

<b>Hide Projects:</b> Select to hide projects in index and report tabs.	<b>Hide Projects:</b> Select check box to hide project. The hidden projects won't be displayed in projects and reports tab.
<input type="checkbox"/> Project 1 : Lorem ipsum dolor sit amet, consectetur adipiscing elit.	

### How to add projects

In order to add new projects, you need to login to TrackThrough system and your account must have the permission to create projects. Select the Projects tab and click +New.

**Click the button + New**

Dashboard
Projects
Tasks

### Enter project details

You will then be required to enter project details such as a project title and a full project description describing what the project is about, what the project entails as well as any other important details pertaining to the project you wish to add.

You will have an option to upload a project logo, should you have one or want to upload an image. If you are in possession of any documents, training materials or any other documents about the project, you will then be given the option to upload these documents under the project you wish to add.

You will then be required to click submit to successfully add your project. If there are any errors or missing information, the system will let you know and you will be required fix the errors or upload the missing information before you will be allowed to successfully submit and add your project so that it can become visible and others can view your new project.

### Add Project

\* Project Title:

Max. 200 characters.

Project Icon:

No file chosen

Max. Upload size 1M; Allowed formats (png,jp

Attachments: Allowed file types: png,gif,jp

user4

ct Permission:

☐ View Only
☒ Execute Tas

Submit
Cancel

specific task, you will be required to select the execute task option. By selecting this option the user will be able to correspond and complete the task that has been allocated to the user.

☐ Task 9: Lorem ipsum dolor sit amet, consectetur

amet, consectetur adipiscing elit.

Assigned to: user2 , user3 [Assign task](#)

**View-only task(s)**

You can see view-only tasks in project and project view page. When tasks are assigned to user as view-only the font color of the task appear in grey color which indicates it is view-only task. View-only tasks can be useful in assigning task to users where you don't want the user to comment or attach files to task but only watch and download content of that task.

### Managing tasks

You need to login to the TrackThrough to perform the operations below:

Progress: 95%

Submit
Reset
Request Review

**Requesting task to review**

Once a user has successfully completed a task which has been assigned to him or her, the user will have to then set the task for review.

Reset
Re-assign
Close Task

**Closing or re-assigning the task**

Once the project owner has reviewed these tasks which reviews have been requested for, and if the task has been satisfactorily completed, the project owner may then click **Close Task**, or in the case where a task is not completed satisfactorily, the project owner may then select the **Re-assign Task** and then allocate the same task to another user to complete or correct errors that the first user made.

Created On: Monday at 3:23 PM

This task has been closed. [Open the task](#)

**Opening closed task**

Once a task has been completed and closed, the project owner is authorised to re-open the same should they so wish and for whatever reason they choose to do so.

### Copying and moving tasks

You need to login to TrackThrough system and must be the project owner or an administrator to do the following operation. Select the tab *Projects* from main menu. Locate the task you want to copy and click to open the task page.

**Copy task for the project owner**

The owner of the project can copy task to another project he or she owns. Select **Copy task** from task view page.

### How to send messages?

Please use your login details to be able to send message via the TrackThrough system. Normal, simple users will not be authorised in the form of their permission settings to be able to access sending messages.

☒ Task 4 : Lorem ipsum dolor sit amet, consectetur adipiscing elit.

☒ Task 5 : Lorem ipsum dolor sit amet, consectetur adipiscing elit.

#### Select task

Once you have successfully logged into your account, you must select the task in order to be able to access the task. If you have been issued with team login details you are able to send messages to the project owner that has been assigned to you.

If you have been issued with lead credentials, you are authorised to send messages to the team that is working on your projects which you have assigned to them. This is the ideal way in which to keep in touch and keep everyone well informed.

Dashboard
Projects
Tasks

#### Add Description

Attachments: Allowed file types: png,gif,jpeg,jpg,txt,doc,docx,xls,xlsx,zip,rar,sql,php,psd,mht,ini,ppt,mdb,css

No file chosen

Max. Upload size 600M.

#### Enter comment details

You will then be required to click on the blue **Comment** button where you will be able to enter the message which you need to get to users working on tasks you have assigned. You will also have the option to attach and upload documents to distribute information you wish to get to your users.

## Administer messages

You need to login as administrator or project owner to access messages and attachments. Messages and attachments related to your projects and tasks can only be accessed. An administrator is however able and authorised to access any project, task or issue.

In order to do this you will be required to navigate to project view, task view and issue view page.

Dashboard Projects Tasks

Admin

### Delete message

Any message that has been deleted by a user or a project owner are hidden and not visible on the message board, however an admin will still be able to view messages which have been deleted. Only administrators are able to permanently delete messages so that one can no longer view them.

### Revoke message

Messages which have been deleted by any user or project owner are only visible to administrators and are hidden from other users on the message board. Administrators are able and authorised to revoke hidden messages and then once again make them visible to all on the message board, thus enabling all users to be able to see and read this message yet again.

## How to bookmark

You need to login to TrackThrough system. Users are able to bookmark certain items such as projects, tasks, comments and messages in order to refer back to them quickly when one needs to refer back to a certain message or even when one needs to access a project or task quickly. Navigate to project view, task view or issue view page to bookmark.

### Select bookmark icon

Click on the bookmark icon to bookmark the project, tasks, issues and comments.

## How to change theme?

You need to login into TrackThrough system and you can find theme palette just after search box in the header.

### Select theme

There are 6 predefined themes namely red, grey, plum, violet, lime and black. You can even create a new theme or modify existing theme. Please refer to the section: [How to create your own theme?](#)

## How to view projects, tasks and issues?

In order to view project content, you will need to log into the TrackThrough system, navigate to the projects page.

### Hiding and showing the project contents

Select expand icon  to see all contents of a project that has been hidden.

Select the collapse icon  in order to hide the project content.

### Hiding and showing the tasks or issues

Select the collapse icon  to hide all the tasks or issues.

Select the expand icon  to see all the tasks or issues contents.

## Filters

The tabs - **Projects**, **Tasks** and **Issues** provide a filter to display based on status; e.g.: display open tasks or issues. There are 3 filters as follows:

**Project filter**

This is where a user selects a project in order to be able to view tasks and issues specifically about and relating to the selected project.

**Task filter**

This is similar to the project filter, but is specifically for the tasks. Select any task status in the task filter on the project pages and then the user is able to view tasks based on status or progress made on the task.

**Issue filter**

Again similar to the above 2 filters, just directed at issues, a user selects any issue status in the issue filter and is then able to view issues based on specific status.

**Task Priority**

This is similar to the task status, but is specifically for the tasks. Select any task priority in the task priority filter on the project pages and then the user is able to view tasks based on priority.

**Issue Priority**

This is similar to the issue status, but is specifically for the issues. Select any issue priority in the issue priority filter on the project pages and then the user is able to view issues based on priority.

**Sorting Ascending**

Sort of Tasks or issues in ascending order.

**Sorting Descending**

Sort of Tasks or issues in descending order.

## Searching content

user1

Go

### Enter a keyword to search

You can find a search bar in the header with a Go button next to it. Should you need to search for any term, word or phrase, you can do so here by simply entering what you need to search for into the search box and then click the go button. If there is content relating to the term or phrase you have search e.g.: (project description, task title, etc.), it will then be listed after the search is completed.

Dashboard

Projects

Tasks

### Search Results

87 matches found.: lorem [Edit search setting:](#)

Project 1 : Lorem ipsum dolor sit amet, co

Lorem ipsum dolor sit amet, consectetur adi

Project 2 : Lorem ipsum dolor sit amet, co

Lorem ipsum dolor sit amet, consectetur adi

Project 3 : Lorem ipsum dolor sit amet, co

Lorem ipsum dolor sit amet, consectetur adi

There is also a section where you can refine your search and add more detail to your search criteria. This can be found in [user settings](#).

## How to create your own theme?

Many users like to add their own personal touch to the TrackThrough system and this is done in the form of themes. The systems does have predefined themes, however in this section we learn how to create our own unique theme for TrackThrough. This is simply the process of altering the visual appearance on the system.

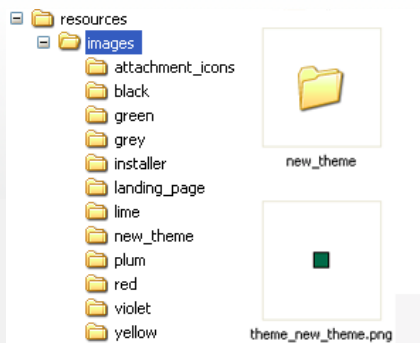

### Creating a folder for the new theme

Firstly you need to create a new folder in the resources\images directory, name the folder the name you would like to give to your theme.

e.g.: new\_theme

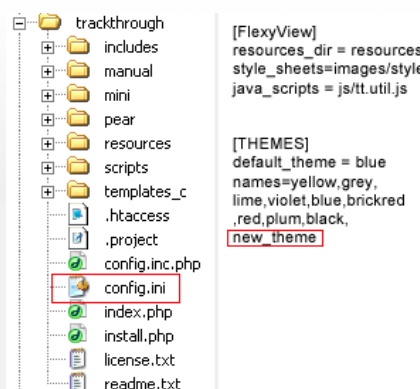

### Creating style.css file

Copy the file style.css from some other theme folder, e.g.: red theme folder. This can be located at, resources/images/red and into the new folder with your theme name that you have just created(new\_theme). Edit the file style.css (resources\images\new\_theme\style.css) and override styles you wish to alter.

### Creating pallet image for the new theme

This refers to a coloured icon that identifies your theme. Create a 13x13 square icon of your choice, uses Photoshop or Gimp to do this, ensure the image file is in PNG format and should have a name similar to theme\_theme\_name.png.  
eg: theme\_new\_theme.png

### Adding your theme to config.ini file

Edit the file config.ini and add your new theme name under the themes section.

```
[FlexyView]
resources_dir = resources
style_sheets=images/style
java_scripts = js/tt.util.js
```

```
[THEMES]
default_theme = blue
names=yellow, grey,
lime, violet, blue, brickred,
red, plum, black,
new_theme
```

### Locating Your theme in TrackThrough

Now you can find your theme in theme pallette on menu bar.

### Examples for overriding style.css file

Assume we want to change menu tab to have green background color. Locate the following in style.css and override as below.

```
menu a{background:#F1EEEE; color:#000000;}
```

to

```
menu a{background:#A9E35B; color:#FFFFFF; border:1px solid #A9E35B;
width:78px; height:24px;}
```
